

Northmount Drive N.W. Improvement Project Invitation to Information Session

Date: Tuesday, May 30, 2017

Drop in: 6 - 8 p.m.

Location: Cambrian Heights Community Association (600 Northmount Dr N.W.)

Information session participants will be provided with project updates, including:

- Updated Phase 1 design
- Updated construction timelines
- Impacts to traffic and associated detours
- Project alignment with 14 Street N.W. surface overlay

Project Update

Since 2015, The City has been working with people who live, work and travel on Northmount Drive N.W. to develop a Complete Street improvement plan for the corridor, which would safely accommodate all travel modes. Throughout the year-long engagement process, over 500 people attended the engagement events and over 1,000 in-person and online feedback forms were collected. The City learned that issues of speeding, pedestrian safety, congestion and school site safety are long-standing concerns along the corridor. The project team worked with the community and stakeholders to develop a design to better address those concerns.

With increased scope and costs for the updated design, The City will phase construction on Northmount Drive N.W. starting with pedestrian improvements along the corridor and operational improvements at the 14 Street N.W. intersection. The remainder of the corridor will be constructed as funding becomes available.

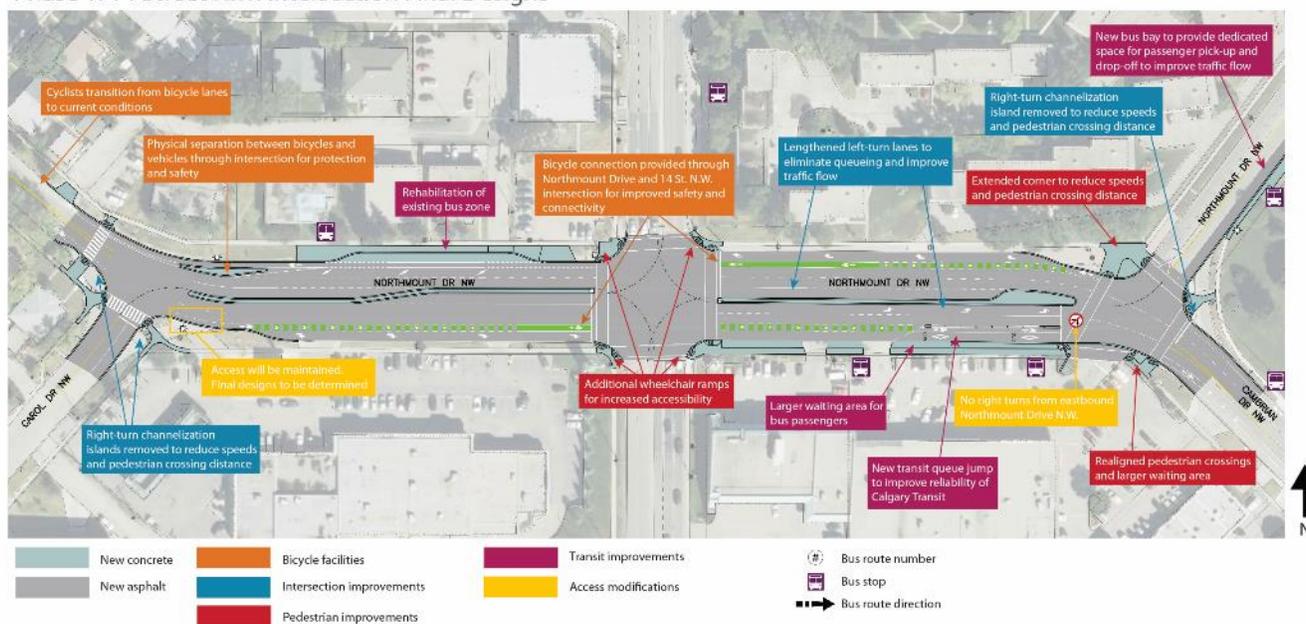

14 Street N.W. improvements and new pavement

This summer, Northmount Drive N.W. will be re-paved between Cambrian Drive N.W. to Carol Drive N.W. At the same time, several safety and operational improvements will be implemented including:

- Advance left turn signal for transit
 - A new bus bay
 - Lengthened left-turn lane from westbound Northmount Drive N.W. to southbound 14 Street N.W.
 - Accessibility improvements for pedestrians at 14 Street N.W.
 - Pedestrian improvements at both Carol Drive N.W. and Cambrian Drive N.W.
 - Bike lanes extended to Carol Drive N.W. creating a bicycle connection through the intersection
-

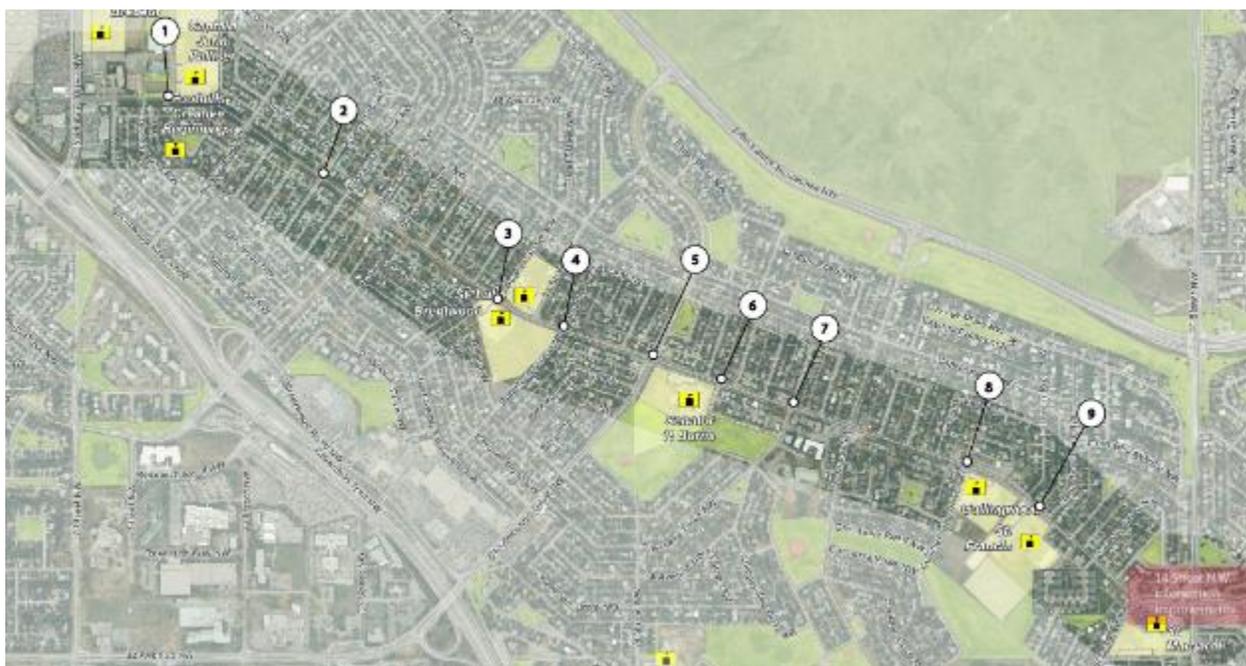

Invitation to Open House

Northmount Drive N.W. Improvement Project Phase 1: 14 Street N.W. Intersection Final Designs

Pedestrian improvements

Phase 1 will also include the addition of nine low-cost curb extensions along the corridor to improve pedestrian safety by reducing crossing distances, improving visibility and reducing vehicle speeds. These improvements will be upgraded as funding becomes available.
